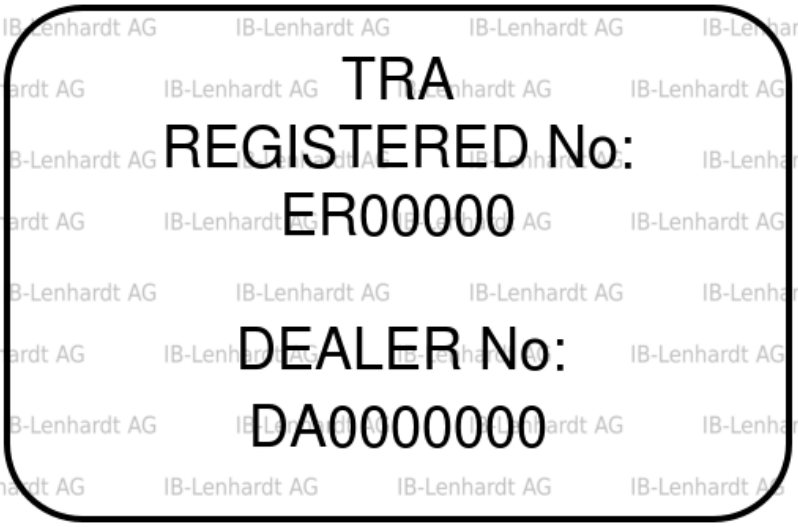
LABEL REQUIREMENTS – REGULATIONS – HOMOLOGATION FOR UNITED ARAB EMIRATES - TRA



LABELING SUPPORT

Each product is subject to marking requirements. The label regulations often differ from country to country. This is where we support you with all necessary information and the specific requirements for national markings. Furthermore, we assist you from label design via label draft through to the final label application. This will allow you more room for the essential: your product.
Below you will find an example of the TRA Label:
We can gladly provide you an example without watermark saved as JPG, PNG, SVG, DFX, or DWG file.
Get your label service for TRA at a very reasonable price.

As we believe that labeling should be simple and effective, we have created our Label-Tool to allow registered users of our TAMSys (Type Approval Management System) to create and save their required labels on their own. You can learn it in a few easy steps.

If you have any question or need further information about labeling in United Arab Emirates, please feel free to contact us and we will be glad to help you.

We offer complete handling for the Type Approval and Homologation of your product in United Arab Emirates and worldwide.
